Claims 1-16 are currently pending.

**Restriction Requirement**

Restriction to one of the following inventions is required under

35 U.S.C. 121:

- I. Claims 1-13, drawn to polynucleotide, vector, cell, method of producing polypeptide, and kit, classified in class 536, subclass 23.1 and class 935, subclass 66.
- II. Claim 14, drawn to method of treating using T-cells.
- III. Claim 15, drawn to method of treating using immunoigen.
- IV. Claim 16, drawn to method of diagnostics using agent specific for tumor rejection.

The inventions are distinct, each from the other because of the following reasons:

The product of Group I and methods of Groups II-IV are unrelated as the methods do not utilize the product of Group I.

Inventions II - IV are related as independent methods which are not connected in design, operation or effect. The methods have different modes of operation, different functions, and different effects.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(h).
